Introduction **Collection**

Step into a world of sophistication with the Collection, a masterpiece of design and craftsmanship. Inspired by timeless beauty and modern aesthetics, this collection redefines luxury with exquisite textures, refined finishes, and unparalleled durability. Whether for interiors or exteriors, each tile embodies elegance, offering a perfect balance of artistry and functionality. Elevate your spaces with Our Collection – the ultimate evolution in surface design.

STRENGTH THAT LASTS

STYLE THAT SHINES

Discover the art of **Surface Combinations**

Where textures, finishes, and colors come together to create stunning design harmony. From modern minimalism to timeless elegance, our crated surfaces redefine sophistication for every space.

Size up your Design

Versatility and flexibility are at the heart of Our Collection. The vast range of sizes, which runs from is designed to adapt to the needs of any location, whether commercial or residential. Together with the colour combinations, it enables total architectural freedom.

PORCELAIN TILES MOSAICS

Colors

Where Innovation Meets Timeless Elegance.

Light at these latitudes caresses rather than sculpts, it creates soft atmospheres and is reflected on bright surfaces in neutral, natural colours and amplifies indoors. The style reflects the harmony and beauty of nature with an essential, neat design that enhances the atmosphere, creating rooms with a modern and elegant charm.

INSTALLATION INSTRUCTION

SURFACE PREPARATION

Apply cement mortar bedding on the surface and spread the entire mortar evenly. For flattened surface approximately 10mm thick cement mortar bedding is preferred.

DRYING PROCESS

The drying time of cement mortar bedding is approximately 48 hours, as it will exceed the contraction and expansion of feature of cement.

LAYING PROCESS

Prepare a cement bed and evenly spread it across the surface using a 12mm metal comb (refer to the image). This technique ensures a firm fix without air pockets after installation. Follow the same method when applying tile fixing adhesive to the back of the slab, maintaining a 10mm thickness while holding the slab on its length side.

HANDLING

Vaccum cups. Vacuum cups are usually used to lift glasses, it can be used on the surface of polished tile, to lift it to the exact area of the fixing. May not very effective for satin and matt surfaces)
Once the slab is laid, the same has to be hammered by soft wooden base hammer to ensure proper laying and fixing.

CUTTING AND HANDLING

Use diamond tools which are generally use to cut glasses, for cutting any surface of Elysian. First a line has to be drawn on the surface pressing the tool considerably to ensure a deep cut mark line and this can be used sil the slab is cut deep to the level of 1 to 2mm and then can be cut with a proper cutting tool for cutting the 9mm thick body of the slab. Cutting systems are also available with companies manufacturing such systems.

CUTTING AND DRILLING METHODS

CARE AND MAINTENANCE

These are the so-called final cleaning operations: this is the most important step, as it influences the results of the subsequent use of the product. Its purpose is to remove any trace or residue of foreign matter from the surface of the slabs. If you have used a cement-based sealant during installation, once the grout has dried, Evvolution recommends carrying out the following operations:

- Remove any coarse dirt using a vacuum cleaner,
- Wet the floor with clean water in order to soak and protect the joints against the corrosive action of the detergent
- Clean using a suitable acid detergent, which can be applied by hand (with a clean cloth) or with a machine (a single-brush machine with medium, non-abrasive bristles or a high-pressure water cleaner);
- Soak up the cleaning solution with a clean cloth or a suitable vacuum cleaner,
- Thoroughly rinse surfaces with clean, warm water to neutralise the action of the detergent,
- Remove any build-up by scraping it off;
- If needed, clean the surface again with the single-brush machine, using a diluted neutral or alkaline detergent, then rinse using clean warm water and dry.
- If an epoxy sealant has been used during installation of the product, given the chemical nature of such product, any remaining residue on the porcelain tile's surface should be removed before the grout has hardened completely and carefully follow the instructions supplied by the manufacturer.
